Part III DETAILED ACTION

1. Claims 3-13, 16-36 are pending.
2. claims 3-13, 16-27 stand withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to non-elected inventions, for reasons set forth in Paper No. 9.

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 28-29, 32, 33, 34, 35 and 36 are rejected under 35 U.S.C. 101 because the claimed compounds read upon naturally occurring compounds. If Applicant amends the claims by the insertion of "An isolated ...", it would obviate the rejection.

4. Claims 28, 30, 31, 33-36 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear what is encompassed by the term "having". It is suggested Applicant amend the claim by the insertion of comprising instead of having.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371⁶ of this title before the invention thereof by the applicant for patent.

5. Claim 29 is rejected under 35 U.S.C. § 102(b) as being anticipated by U.S. Patent No. 5,919,687 (A).

The '687 patent teaches fragments (i.e. C-terminal or N-terminal truncations) of the full length enzyme which retain eukaryotic N-SMase enzymatic activity (column 4-5, in particular).

The prior art teachings anticipate the claimed invention.

Art Unit: 1644

6. Claims 29 and 30 are objected to because of minor informalities.

There is no period at the end of claim 30 and there is no preposition such as "an" at the beginning of claim 29.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patrick Nolan whose telephone number is (703) 305-1987. The examiner can normally be reached on Monday through Friday from 8:30 am to 4:30 pm.
